

# VigilantMEDR

**Protecting Your Assets in the Cloud, At Home, On Prem,  
and Everywhere in Between**

Today's sophisticated attackers are going beyond malware to infiltrate organizations with hard-to-detect credential theft and tools that are part of the victim's environment or operating system. Vigilant Managed Endpoint Detection and Response (MEDR) is the powerful solution that sets a new standard in stopping breaches with unparalleled real-time and historical visibility across endpoint events and alerts.

## Streamlined Detection and Protection

Through our unique combination of market leading technology and Vigilant SOC processes the VigilantMEDR offers a strong, intelligent and complete approach to endpoint security, so you can protect your systems and simplify your environment without the need of multiple vendors or point products. All of these activities are made possible by the collaborative cybersecurity framework in which we work shoulder-to-shoulder with your team.

***The Results: Stronger detection, protection, and increased efficiency – without the need and expense of multiple vendors.***

## One Team – Multiple Benefits

### IMMEDIATE SECURITY HARDENING AND ATTACK IMPACT RESISTANCE

#### Vigilant remains endpoint tool agnostic to keep our clients nimble

Every contract we offer is for our service – not the tools – so you can be assured that we will always recommend the proper tool to meet your present-day needs vs. locking you into a less effective or even outdated tool. The ability to remain nimble and agile for and with our clients is critical.

### WE NEVER SLEEP – SO YOU CAN REST EASY

#### Vigilant provides 24/7/365 Managed Detection & Response

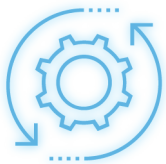

Part of what sets the relationship and service Vigilant provides apart from the competition is our elite team of security professionals that continuously and proactively provide unparalleled visibility, proactive threat hunting and forensic investigation. We stay on the prowl to advise on activity in your environment and ensure threats and high-priority alerts are never missed. And Vigilant's proprietary alert prioritization uniquely pinpoints the most urgent threats while eliminating false positives. The result is clarity on every attack with a guided response to remediate real time.

### VISIBILITY AND ANALYSIS THROUGHOUT ALL COMMUNICATION LAYERS

#### Vigilant provides assurance through transparency

Gain real-time threat intel and verification with Vigilant's CyberDNA® Platform – including potential active threats, threat origins, as well as resolved and unresolved incidents. Data visualizations verify which policies are working and which ones need improvement.

### UNPARALLELED OPERATIONS & SUPPORT

#### Continuously level-up your defense with state-of-the-art cyber protection

Vigilant provides the expertise, resources, tradecraft, and focus that will mature your entire organization into a modern cyber fortress. We are your co-vested partner in advanced threat assessment, evolving vulnerability detection, and Team-Centered support. VigilantMEDR offers continuous operation and administration of protection components, which include:

- Policy configuration
- Response playbook development
- Custom tuning

### UNLIMITED BREACH RESPONSE

#### No retainers or additional fees – our warranty is unmatched in the industry

Never pay a Breach Response retainer again. We'll provide you with a Titanium Certificate that you can give to your insurance company.
