

VigilantMNDR

Managed Network Detection & Response

Identify, Verify and Eliminate Threats Faster

VigilantMNDR is a patented fully managed service that includes the tech, the experts, and the process to keep your network safe – by finding attackers in your environment where they normally avoid detection.

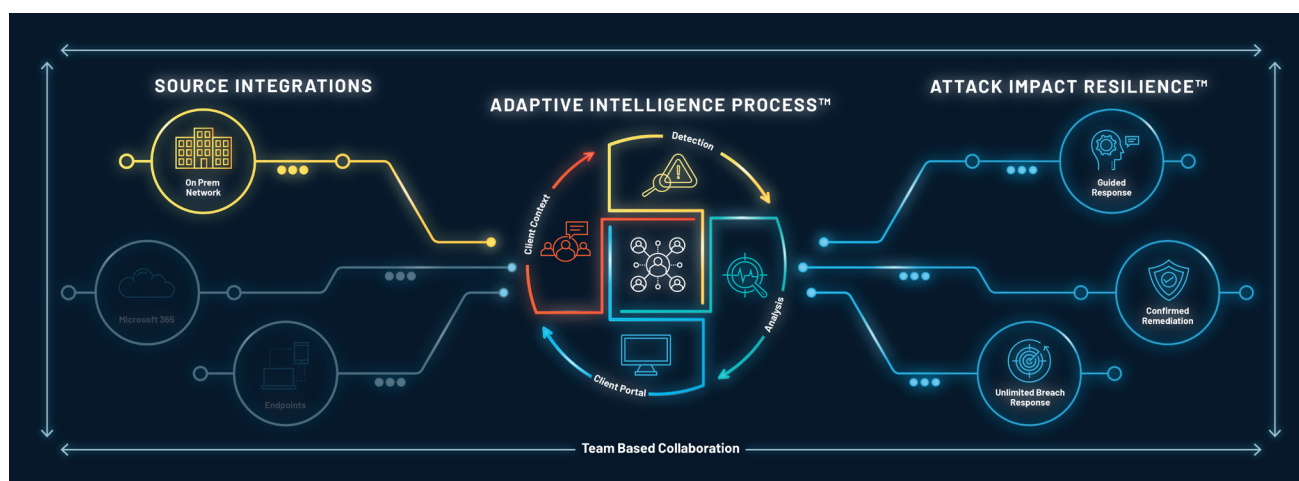

The Best Defense is a Killer Offense

Most security firms today focus all of their energy on protection and defense. This has led to the astounding average of over 270 days to discover breaches. VigilantMNDR is different. By focusing on detection and offense, (we are able to do this because of the trusted source data we capture by placement of invisible network sensors) threats are identified exponentially faster – pinpointing cyberattacks and eliminating threats inside your perimeter within minutes – before data is compromised.

VigilantMNDR Detects Threats That Breach Your Network Defenses

Our advanced sensor technology works in tandem with a 24/7 network of cyber security experts to deliver the intelligence you need to detect and eliminate threats before they infiltrate your infrastructure with:

- Long term data storage
- Expert analysis, hunting, and investigation
- Out of band sensors
- Customized recommended courses of action

Because we can identify early signals of an attack, we can remediate faster and prevent impact. This is possible through:

SOURCE CONTENT COLLECTION

Not All Data is Created Equal

Vigilant ingests source content in addition to abstracted log data. The result: better quality of data and data fidelity that allows us to see the entire kill chain.

PROPRIETARY TECH

Not a commoditized “off-the-shelf” solution

VigilantMNDR is not a commoditized “off-the-shelf” solution, so hackers can’t buy it and exploit it. In fact, Vigilant’s proprietary decentralized detection and analysis technology finds attackers in your environment where they normally avoid exposure. It also provides forensic proof that threats have been eliminated – for the ultimate peace of mind.

COLLABORATION

The Vigilant Hunt Team is Committed to Your Cause

Because we collaborate with you at the beginning, middle, and end you can count on Vigilant’s “hands-on” dedicated team of intrusion analysts, threat hunters, incident response analysts and offensive security operators to combine their multifaceted skillsets to monitor, analyze, detect, and disrupt malware attempts and threat actor behavior – resulting in reduced “false positives,” and a guided, faster response.

RADICAL VISIBILITY

Vigilant Provides Assurance Through Transparency

Gain real-time threat intel and verification with Vigilant’s CyberDNA® Platform – including potential active threats, threat origins, as well as resolved and unresolved incidents. Data visualizations verify which policies are working and which ones need improvement.

UNLIMITED BREACH RESPONSE

No Retainers or Additional Fees – Our Warranty is Unmatched in the Industry

Upon certification, never pay a Breach Response retainer again. We’ll provide you with a Titanium Certificate that you can give to your insurance company. With VigilantMDR, we have you covered from the core-to-the-edge, and from threat incident to remediation – every time.
