

# SUCCESS STORY

**Client:**  
LARGE MANUFACTURING COMPANY

## VigilantMDR Provides Advanced Threat Detection

**Solution:**  
MANAGED DETECTION & RESPONSE  
(INCLUDING VIGILANT365™  
& VIGILANTMEDR)

*Vigilant Managed Detection and Response provides 24x7 monitoring of your networks, endpoints, and Microsoft 365 environments to help you pinpoint and eliminate attacks before your data and assets are compromised.*

### Detection

### Visibility

### Precision

#### BUSINESS CHALLENGE

When it comes to proactive detection, legacy solutions are no match for today's modern cyber threats. To stay one step ahead, companies require a complete solution that defends your organization from the inside out, while threat hunting and detecting from the edge in.

#### VIGILANT SOLUTION

To protect against data and revenue loss from ransomware and other advanced attacks, a large manufacturing company was looking at a number of cybersecurity solutions including ones at Palo Alto, Crowdstrike, and SentinelOne but went with Vigilant due to our holistic **Managed Detection & Response** approach to security, our client commitment, and Unlimited Breach Response.

#### OUTCOME

VigilantMDR featuring Vigilant365™ and Endpoint provided the client with:

- Faster detection
- Visibility into the entire kill chain
- Reduction of false positives
- Extended team to provide remediation guidance
- Unlimited Breach Response

**USE CASE:** This large manufacturing company experienced a ransomware attack that led to a breach response. And although they recovered from the previous attack, they did not have the tools and expertise to prevent similar attacks in the future. Since 90% of ransomware attacks occur through email, Vigilant365™ was implemented to detect potential email compromise. Vigilant's MEDR was also put into action to protect all of the manufacturing company's endpoints from advanced attacks.

#### Why VigilantMDR?

We will work with your existing tech stack to provide radical visibility made possible by the source content we collect.

- Unlimited Breach Response
- Radical Visibility with CyberDNA® Platform
- U.S. Based 24/7/365 Security Operations Center Team
- Curated and Designed Source Content
- Dedicated Hunt Team
